

CELEBRATING 25 YEARS IN BUSINESS & COUNTING!

In **1946**, Luigi Buzzi designed the first balancing machine with a revolutionary solution. CEMB S.p.A quickly grew and established itself as a specialist in vibration technology and as a manufacturer of equipment for balancing rotating parts.

In **1997**, Hofmann Maschinen – und Anlagenbau GmbH, market leaders of wheel and tyre assembly and tyre grading lines, was acquired by Carlo Buzzi and now operates as a partner of CEMB S.p.A.

In **2001**, Benrath Balancing Machines & Services was acquired by CEMB Hofmann UK and integrated into the business as the new contract balancing service.

In **2005**, our first apprentice was taken on as part of the company's investment in its UK service department.

2017 saw the launch of a brand-new range of balancing machines manufactured specifically for the e-vehicle industry.

Joining his father's company in **1977**, Carlo Buzzi is now a graduate in engineering. He gives a considerable boost to new designs based on the latest digital technologies, giving birth to the development of high precision monitoring and supervisory systems.

In **1998**, our current managing director Robert Jeffery, Tom Southwood and Mark Davies, in partnership with Carlo Buzzi, established CEMB Hofmann UK in Manchester as a subsidiary for CEMB S.p.A. and Hofmann Maschinen - und Anlagenbau GmbH.

Between **2003** and **2005**, a six-figure investment was made in balancing machines and equipment for the company's contract balancing facility in Manchester.

In **2011**, continued investment in our apprenticeship scheme and in collaboration with our parent company, we started 18-month placements of our service staff at CEMB S.p.A's training academy in Italy.

Today, following continuous growth and investment, CEMB Hofmann UK is the market leader in dynamic balancing machines and services in the UK.
